

HYPERBARIC OXYGEN THERAPY BRIEF FOR ORAL & MAXILLOFACIAL SURGERY PATIENT CARE PARTNERS

In addition to our successful patient outcomes treating radiation-induced **osteoradionecrosis of the mandible (ORN)**, please be aware of other approved conditions by most insurers for adjunctive hyperbaric oxygen therapy:

- Chronic, painful oral lesions
- Abscess
- Osteitis
- Osteomyelitis
- Sequestrum of the jawbone
- Periostitis

Before

After

Hyperbaric oxygen therapy helps expedite healing in these inflammatory conditions along with your conventional treatments including debridement and antibiotic therapy.

To ensure continuity of care and alleviate any extra burden on your practice, HyOx's patient advocate team members initiate and provide insurance verification and approval for treatment to expedite consult to treatment time.

Dr. Marianne Taryla and I are committed to optimal outcomes for your patients and are available to answer any questions regarding our treatment and services.

Thank you.

Richard W. King, Jr. MD, FAAPMR, CWS, UHM

HYOX

HYPERBARIC MEDICINE HEALS.

HyOx is a comprehensive medical treatment center specializing in healing the body naturally by breathing 100 percent oxygen under pressure. Hyperbaric oxygen therapy increases oxygen content in the body by up to 1,500 percent to supersaturate every cell. This helps to fuel the healing process in patients with complications from cancer, infection, trauma, and wounds.
