

HyOx Medical Director Named One Of Atlanta's *Top Doctors*

Atlanta Magazine's List of the City's Most Trusted Physicians

In a city full of newcomers, it can be hard to find the right doctor. You can use one of those impersonal referral services or thumb through a phonebook-sized insurance directory, but those listings don't instill a high level of confidence. If you could only ask the doctors themselves! Well, that's just what we did. Here are the doctors whom other physicians say they'd call when they need medical attention.

- Atlanta Magazine, July 2007

Atlanta Magazine last published "Top Docs" in 2005, and that issue has remained one of the publication's most requested. To produce this month's feature, we once again hired Castle Connolly Medical Ltd. The New York-based research firm, which has been recognized by such publications as *The New York Times*, *The Chicago Tribune* and *The Boston Herald*, surveys the medical leadership of area hospitals as well as a sample of board-certified physicians in a given region. Its process is anonymous and confidential.

PHYSICAL MEDICINE & REHABILITATION

Richard W. King, Jr., MD

HyOx Medical Treatment Center

2550 Windy Hill Road, Ste. 110

Marietta, GA 30067

678-303-3200

WellStar Windy Hill Hospital, WellStar Cobb Hospital,

WellStar Kennestone Hospital, Piedmont Hospital

Special Expertise: Cancer Rehabilitation, Soft Tissue

Radiation Necrosis, Hyperbaric Medicine

How the Survey Was Conducted

Castle Connolly's physician-led team of researchers follows a rigorous screening process to select top doctors on both the national and regional levels. Using mail, telephone surveys and electronic ballots, they ask physicians and the medical leadership of leading hospitals to identify highly skilled, exceptional doctors. Careful screening of doctors' educational and professional experience is essential before final selection is made from among those physicians most highly regarded by their peers. Advertising in *Atlanta Magazine* is in no way connected to the selection of doctors for this issue or any future "top doctors" listings that Castle Connolly may produce or license.
